DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 28-30 recites the limitation "said chamber wall " in whereby clause.

There is insufficient antecedent basis for this limitation in the claim. It is unclear whether this wall is the top wall which has been recited or the wall that directs flow out of the tube.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Heilmann et al. (EP 0728509).

Heilmann et al. discloses a tubular medical set comprising an in line bubble trap chamber having a top wall, the top wall having a portion which communicates with flow tubing and a port tube which extends into the chamber and has an inner tube spaced

below the top wall. The wall that directs the flow out of the tube is circumferentially of the bubble trap chamber. And the baffle is disposed at the bottom of the chamber.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 28-30 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S. Patent No. 6,517,508. Although the conflicting claims are not identical, they are not patentably distinct from each other because both claim an in-line bubble trap chamber having a top wall, a port, a port tube and a baffle. The only slight difference in the apparatus claims is the terminologies of the functionally language which amounts to the same function.

Response to Arguments

Applicant's amended claims which bring up new rejections. Applicant is reminded to file a terminal disclaimer to overcome the rejection without delay.

With respect to the dependent claims which were withdrawn from the restriction imposed, the claims will be reconsidered at the time of allowance if the claims do not introduce any further claim objections or rejections such as (112, 1st or 2nd paragraphs).
